

@WORKAlerts is a system for the communication of data from your internal system databases to your drivers, staff, customers or suppliers via their mobile phone.

@WORKAlerts FUNCTIONALITY

- Full broadcast capabilities
- Send a text message (SMS) to any mobile anywhere in the world
- Failure alerting – an administrator is immediately alerted if any SMS message fails to be delivered
- Full audit logging of all activity of the service
- Statistic reporting
- Simple Interface – send a message over a HTTP POST, insert directly into a database, or use a Web Service (SOAP over HTTP)

@WORKAlerts BENEFITS

- Overall cost reductions
- Improved efficiencies
- Increased productivity
- Improved customer service
- Service branding
- Driver safety
- Enhanced service offering

SwiftTXT is a dynamic company delivering innovative mobile solutions, using leading edge technologies. Founded in 2001 by a team which harnesses a wealth of expertise in logistics, wireless & Internet technologies and research & development. **SwiftTXT** subsequently established a strategic research alliance with University College Dublin, ensuring the latest technologies are encompassed in the product range.
